

## TOTE SYSTEMS

The Tote System is a convenient method of mounting transfer equipment onto IBC tote tanks. Steel mounting plate supports weight of pump, reel and meter, preventing damage to tank. Basic mounting plate kit is 40" wide and is provided with a versatile hold down bracket to fit most commonly used IBC tote tanks such as Clawson, Hoover and Greif.

Optional bulkhead fitting and vent cap kit allows equipment to be left in place while providing tank venting and refilling access.

By using the convenient selection guide provided, you can easily customize your system to fit your particular application.

Note: Tote tank not included.

P/N **950026**

IBC Tote Mounting Plate Hardware Kit, includes all hardware to attach mounting plate to tote tank and allow mounting of pneumatic pump, hose reel and discharge valve/meter. Fits most standard IBC tote tanks w/40" wide frame.

P/N **901071**
