

PS90 Parcel Scale for shipping manifest applications

The PS90 Parcel Scale is a member of the PS Scale Family. With its 300lb or 150lb capacity it is the heavyweight of the PS Scale Family. If you weigh very heavy parcels or want to add a scale into a conveyor line, this is the scale for you. It connects easily to a PC and is compatible with all Shipping Manifest Software applications.

The PS90 is NTEP certified so it can be legally used in commercial applications. The National Type Evaluation Program (NTEP) imposes rigorous standards that ensure the high accuracy and reliability of the scales that bear their mark.

Our patented GEOCAL™ calibration feature eliminates the costly need to have the scale site-calibrated. Competitive offerings require certified technicians to calibrate their scale on-site. GEOCAL™ ensures accurate calibration without hiring an expensive technician.

The PS90 has optional Ball and Roller Platter Tops for flexible usage. Step-up to METTLER TOLEDO quality and rely on the world's leading scale manufacturer for all your critical business shipping needs.

METTLER TOLEDO

PS90 Parcel Scale Specifications

- 300 or 150 pound capacity for parcel weighing — For Heavy Duty Use
- GEOCAL™ Calibration Compensation — Ensures Local Accuracy
- Multiple platter options for flexibility
